

Federal capability statement

Strace Technologies is a veteran-owned cybersecurity firm based in Plano, Texas. We provide practitioner-led cybersecurity services for government organizations and the Defense Industrial Base, with incident response and digital forensics at the center of our practice.

CORE CAPABILITIES

Incident response and digital forensics

Reactive response, IR retainers, forensic investigation, threat hunting, and litigation-support documentation with chain-of-custody discipline.

Penetration testing and offensive security

Authorized testing of external networks, internal networks and Active Directory, and web applications, under written rules of engagement.

Technical security assessments

Validated vulnerability assessments and fixed-scope, NIST-aligned security reviews, with written findings, severity tiering, and concrete remediation steps. Vulnerability assessment is available independently or alongside penetration testing.

Microsoft 365 and Azure security

Assessment and hardening of Microsoft 365, Azure, and Entra ID environments against current Microsoft and CISA guidance.

Security advisory

Fractional security leadership, strategy and roadmaps, governance and risk, and security program advisory.

Cyber workforce and training

Executive briefings, phishing awareness and simulation, and role-based cybersecurity training for staff and leadership.

WHY STRACE

Senior practitioners stay accountable from scoping through delivery.

Founded by practitioners whose experience spans U.S. military service, federal cybersecurity operations, and enterprise security leadership.

Written scopes define deliverables and timelines. Reports give technical and executive audiences findings and remediation priorities.
